

Creation Partners with Industry Experts to Host Customer & Supplier Forums in California and Ontario

Creation's California and Ontario facilities will open their doors this Spring to their Electronics Manufacturing Services (EMS) partners.

The forums will be hosted April 21st in Creation - Santa Clara, California, and May 13th in Creation - Mississauga, Ontario, promoting Strategy & Synergy throughout the EMS supply chain.

Close collaboration and integration are critical to a competitive edge in the current economy, and the Creation forums will unite significant electronics manufacturing players to develop creative ways to stay ahead of the curve.

In attendance will be Creation's Original Equipment Manufacturer (OEM) customers, Creation's regional strategic supply base, and a variety of industry experts including senior economist Matt Chanoff of *Technology Forecasters Inc* and Kathleen Geraghty of *eKNOWtion*.

A series of workshops, presentations and panel discussion will feature strategies and ideas not only to adapt, but to thrive in today's economic climate.

For information on attending our forum sessions in California or Mississauga, please contact David Longshore or Randy Ziegenhagel.
