Creation Technologies Appoints Arthur Tymos as COO

Electronics Manufacturer expanding business operations in Canada and the U.S.

Vancouver BC - Creation Technologies, an expert in manufacturing electronics of a highly complex nature, today announced the appointment of Arthur R. Tymos as the company's Chief Operating Officer. In his new role, Mr. Tymos will be responsible for ensuring the efficiency of Creation's operations, and will work to shape the vision and direction of the company as it expands to the Northeastern and Central United States.

In joining Creation Technologies, Mr. Tymos brings more than 20 years of experience from a variety of executive leadership, general management, marketing, and finance roles with firms such as BC TEL and BC TELECOM. Most recently, he served as Vice President and Chief Information Officer for TELUS Corporation, and was an active member of Creation's Board of Directors.

"Arthur brings a wealth of experience and vision to the table, and will play a key role in our continued success in Canada and the United States," said Geoff Reed, President, Creation Technologies. "To meet our aggressive growth targets we'll be investing significantly in the U.S. market – combining a targeted sales effort with a plan for strategic acquisitions. Arthur will be at the heart of this growth, and will be instrumental in taking Creation Technologies to the next level."

With a track record of profitable growth in each of its 11 years in business, Creation Technologies now operates four manufacturing facilities in Canada. To continue to meet the high demand for its expertise in medium-volume, high-complexity contract electronics manufacturing, the company is looking to broaden its operations, and expand its customer base.

"Creation delivers the best service possible and provides a total manufacturing solution by becoming a true partner with its customers," said Mr. Tymos. "I am impressed with Creation's high-energy, entrepreneurial culture, and I'm delighted to be on board. I look forward to working with the entire Creation team to grow the business on both sides of the border, and build our reputation as the best high-complexity electronics manufacturer in the business."

About Creation Technologies Inc.

Creation Technologies Inc. is a global top 100 Electronic Manufacturing Service (EMS) provider focused on manufacturing complex electronics for businesses in the wireless telecommunication, medical, industrial controls, transportation and instrumentation markets. The company provides start to finish manufacturing solutions from design support and new product development to final assembly, packaging and product distribution. Creation Technologies' strong financial management, employee ownership philosophy and commitment to investing in its capabilities, have created a highly stable partner for OEMs.

Creation Technologies' full year-revenue for 2002 was \$83 million (year ending May 31, 2002) and the company has a track record of profitable growth in each of its 11 years in business. The company is 100 per cent employee owned, with plants in British Columbia and Ontario. More information about Creation Technologies is available at www.creationtech.com.
