

# Lean Product Development: Get What You Need with End-to-End Solutions

Creation provides start-to-finish design, development and manufacturing solutions that are **tailored to make you successful** in your marketplace. We'll help you choose the ones that are right for you and your goals.

## Design & Development

- Concept & Feasibility
- Project Planning
- Detailed System Risk Analysis
- Architectural Design Development
- Subsystem Design Development
- Industrial Design Model Development
- Prototype V&V Plan Development
- Initial Costed BOM Development

## Planning & Requirements

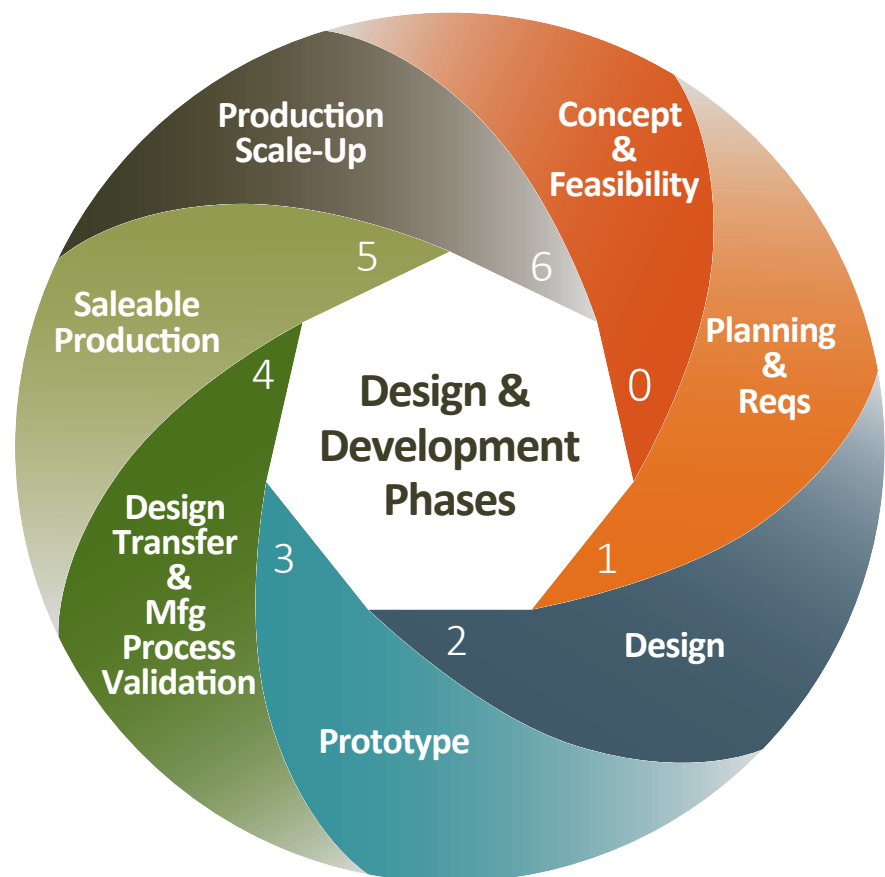

- Design and Development Planning
- Product Development Quality Plans
- System Architecture Development
- Product Requirements Development
- Initial System Risk Analysis
- User Interface Development

## Engineering Proto & NPI

- Rapid Prototyping & Creation Express Services
- Complete Software Coding
- Design Transfer Finalization & Review
- Initial Agency Safety Testing
- Production Readiness
- Manufacturing Transfer
- Final V&V Testing & Reporting with System Risk Traceability
- Conduct IQ/OQ/PQ

## Sustaining Engineering

- Value Engineering
- ECO Management
- RoHS & Environmental Compliance Transition
- End-of-Life Engineering
- Design 'Upgrades'
- PCB Re-Layout
- Warranty & Repair Analysis

**“With a history of solid delivery, Creation Design Services were leaders in developing complicated subsystems. The engineering solutions showed attention to function, precision, and manufacturability.”**

~Bill Wood, VP Research and Development  
Colorado MEDTech
